

Press Release

3 January 2019

Siemens Gamesa reaches €1,72 billion in green guarantee lines by the end of 2019

Siemens Gamesa Renewable Energy is moving forward in its strategy of making sustainability a key element of all aspects of its business, including its funding strategy.

Siemens Gamesa recently extended a guarantee line from Danske Bank to €150 million from an initial €100 million and included Sustainable Development Goals (SDG) criteria. Likewise, the company has signed and also included similar conditions for a new €140 million guarantee line from Mizuho Bank Europe NV.

In less than a year, and aligned to its commitment to sustainability, it has accumulated €1,72 billion in green guarantee lines. Siemens Gamesa will use this to support its business of manufacturing and selling onshore and offshore wind turbines worldwide, with an impact on the Sustainable Development Goals relating to "Affordable and clean energy" and "Climate action".

"Becoming more sustainable and competitive is clearly feasible and positive, and we aim to do it at every step we take. Sustainability and ESG principles are key at every decision, including in our funding and financing strategy", said David Mesonero, CFO of Siemens Gamesa.

Siemens Gamesa has installed over 99 GW of wind capacity worldwide, which produce enough clean energy to power nearly 85 million European households. In this way, the company contributes to eliminating 260 million tons of CO₂ emissions each year, the equivalent of planting over 4 billion trees.

The company also supports the global climate protection goals and has adopted the global initiative to decarbonise economies. Siemens Gamesa is steadily replacing conventional emission-intensive power sources with renewable energies in its operations.

Siemens Gamesa is a member of prestigious international sustainability indexes, such as Dow Jones Sustainability Indices®, FTSE4Good® and Ethibel Sustainability Index®.

About Siemens Gamesa Renewable Energy

Siemens Gamesa is a global leader in the wind power industry, with a strong presence in offshore, onshore and services. Through its advanced digital capabilities, the company offers one of the broadest product portfolios in the industry as well as industry-leading service solutions, helping to

make clean energy more affordable and reliable. With over 99 GW installed worldwide, Siemens Gamesa manufactures, installs and maintains wind turbines, both onshore and offshore. Its backlog stands at €25.5 billion. The company is headquartered in Spain and listed on the Spanish stock exchange (included in the Ibex-35 index).
