

# SAN CRISTOBAL. Wind offgrid plant hybridized with the islands thermal plant.

Commissioned in 2007

 **2.4 MW**  
3x800KW

 **1.95 MW**  
3x650KW

**Hybrid Plant Controller**  
manages the plant to maximize  
Wind Penetration  
(Monthly up to 60%)

**8,3 mill liters** of fuel  
replaced

**Reduction of 20.359 CO2 tons**  
emissions

**SIEMENS Gamesa**  
RENEWABLE ENERGY
