SGRE Wind Training Newsletter – October 2021

Management Corner

Greetings All!

2021, like 2020, has been a year of challenges. However, challenges are not always a bad thing, as they drive change and innovation. For Global Training Excellence that meant new leadership, new ways of working; and new ways of delivering training to those who rely on us for support. I am proud and happy to announce that TREX has hit a major milestone and blazed a path of innovation with the launch of the first SGRE Virtual Reality course.

This is just the beginning of many great things to come. I hope you will join us in celebration and continue to work with us to provide the best learning processes and solutions for SGRE. Please enjoy this edition of SGRE Wind Training Newsletter!

Warmest regards,

Desiree Ugarte
Head of Global Training Excellence

 [Virtual Reality is Here!](#)

Virtual Reality is Here!

Thanks to the dedication and efforts of the TREX team, we have successfully completed advanced technical training solutions for the SG5X using immersive technology (virtual reality). The new technology will allow technicians to learn maintenance and troubleshooting skills where they live and work, saving time and travel to a nearby training center. Using life-like models of the SG5x, this training solution will enable technicians to learn and practice in a safe environment. To view a sample of the new training, please click [here](#).

SGRE Wind Training Newsletter is published monthly. Please contact: > [Simone Fuqlsang Grooss](#) and share your news, feedback or comments.
