Q2 2021 RESULTS
April 30, 2021
DISCLAIMER

“This material has been prepared by Siemens Gamesa Renewable Energy, and is disclosed solely for information purposes.

This document contains declarations which constitute forward-looking statements, and includes references to our current intentions, beliefs or expectations regarding future events and trends that may affect our financial condition, earnings and share price. These statements may be identified by words such as “expect,” “look forward to,” “anticipate” “intend,” “plan,” “believe,” “seek,” “estimate,” “will,” “project,” or words of similar meaning. We may also make forward-looking statements in other reports, prospectuses, in presentations, in material delivered to shareholders, and in press releases. In addition, our representatives may from time to time make oral forward-looking statements. These forward-looking statements do not constitute a warranty as to future performance and imply risks and uncertainties. Therefore, actual results may differ materially from those expressed or implied by the forward-looking statements, due to different factors, risks and uncertainties, such as economical, competitive, regulatory or commercial factors. The value of any investment may rise or fall and, furthermore, it may not be recovered, partially or completely. Likewise, past performance is not indicative of future results.

The facts, opinions, and forecasts included in this material are furnished as of the date of this document, and are based on the company’s estimates and on sources believed to be reliable by Siemens Gamesa Renewable Energy, but the company does not warrant their completeness, timeliness or accuracy, and, accordingly, no reliance should be placed on them in this connection. Both the information and the conclusions contained in this document are subject to changes without notice. Siemens Gamesa Renewable Energy undertakes no obligation to update forward-looking statements to reflect events or circumstances that occur after the date the statements were made.

The results and evolution of the company may differ materially from those expressed in this document. None of the information contained in this document constitutes a solicitation or offer to buy or sell any securities or advice or recommendations with regard to any other transaction. This material does not provide any type of investment recommendation, or legal, tax or any other type of advice, and it should not be relied upon to make any investment or decision.

Any and all the decisions taken by any third party as a result of the information, materials or reports contained in this document are the sole and exclusive risk and responsibility of that third party, and Siemens Gamesa Renewable Energy shall not be responsible for any damages derived from the use of this document or its content.

This document has been furnished exclusively for information purposes, and it must not be disclosed, published or distributed, partially or totally, without the prior written consent of Siemens Gamesa Renewable Energy.

Siemens Gamesa Renewable Energy prepares and reports its Financial Information in thousands of euros (unless stated otherwise). Due to rounding, numbers presented may not add up precisely to totals provided.

In the event of doubt, the English language version of this document will prevail."

Note on alternative performance measures (APMs)

This document includes supplemental financial measures that are or may be alternative performance measures (non-GAAP-measures). These supplemental financial measures should not be viewed in isolation or as alternatives to measures of Siemens Gamesa’s net assets and financial position or results of operations as presented in its consolidated financial statements. Other companies that report or describe similarly titled alternative performance measures may calculate them differently. The definitions and reconciliation of the alternative performance measures that are included in this presentation are disclosed in the Activity Report associated to these and previous results. The glossary of terms is also included in the Activity Report associated to these results.
Q2 21 Key points
Q2 21 Key points

✓ Q2 21 revenue: €2,336m (H1 21: €4,631m) and Q2 21 EBIT margin\(^1\): 4.8% (H1 21: 5.0%). H1 21 EBIT\(^1\) positively impacted by:
  - A comparatively high reduction in Offshore wind turbines failure rates and in third party spending in Service (with impact in Q1 21)
  - Upfront loading of Offshore manufacturing activity

✓ Revenue guidance\(^2\) narrowed: €10.2bn-€10.5bn and EBIT margin guidance\(^2\) maintained: 3%-5% considering the following:
  - Impact of order intake deferrals and project execution delays on top line development
  - H1 21 EBIT performance and ongoing efficiency measures linked to the LEAP program
  - Higher expected supply costs (including raw material prices) and lower Offshore contribution (with the SG 11.0-200 DD manufacturing ramp-up) in H2 21

✓ Turnaround actions progressing with new organization and LEAP program in place
  - Manufacturing capacity consolidation in Spain agreed in Q2 21
  - Ongoing fixed cost reduction through the simplification of the WTG organization

✓ Strong momentum in renewables and SGRE well positioned to benefit
  - Record order backlog of €33.7bn and record order intake of €5.5bn in Q2 21
  - 46 GW in expected auctions in 2021 and 98 GW beyond

\(^1\) EBIT margin pre PPA and I&R costs, excluding the impact of PPA on the amortization of intangibles: €59m in Q2 21 (€119m in H1 21), and the integration and restructuring costs: €71m in Q2 21 (€118m in H1 21)

\(^2\) This outlook excludes charges related to legal and regulatory matters and it is given at constant FX rates. It does not include any impact from a potential lockdown of manufacturing activities or severe disruptions to the supply chain due to COVID-19 developments. EBIT margin guidance refers to EBIT pre PPA and I&R costs
Highest ever order intake in the quarter leading to record order backlog

Siemens Gamesa 5.X entry in new markets
Total orders for Siemens Gamesa 5.X > 2.6 GW in Brazil, Finland, Sweden and now also in UK and Germany

Record quarter for Offshore orders: 2.6 GW
Offshore backlog reaches 8.0 GW, with additional pipeline of 7.4 GW

Gemini 600 MW Service contract extended
It demonstrate SGRE competitiveness with long-term Offshore Service contracts
Further progress in our ESG\(^1\) commitments

- **Top rating** in the sector by ESG Rating agencies: VigeoEiris and ISS\(^2\) ESG
- **Top percentile** by ESG Rating agencies: Sustainalytics (98/100), FTSE Russell (98/100), S&P Global ESG (97/100)
- **Member of ESG Indexes**: Dow Jones Sustainability Indices World & Europe, FTSE4Good, Euronext, EuroStoxx, Ethibel

Committed to respecting human rights and the environment …
Commercial activity
Record order backlog: €33.7bn, up 17.9% YoY, with order intake of €5.5bn in Q2 21

97% coverage of mid-point and 99% of low-end of FY21 narrowed revenue guidance
Volatile profile of Offshore market dynamics with positive impact on Q2 21 order intake both in WTG and Service (compensating lower order intake volume in Q1 21)

1) Solar orders in LTM as of Q2 20 of €64m and €61m in Q2 20. Solar orders in LTM as of Q2 21 of €51m and €51m in Q2 21
2) Revenue coverage: H1 21 sales plus order backlog (€) as of March 21 for FY21 sales activity divided by the FY21 revenue guidance range of €10.2bn to €10.5bn
Onshore order intake, 2.1 GW in Q2 21, dominated by large platforms

Focus on profitability over volume
- Positive YoY trend reflects recovery from strong negative impact of COVID-19 on Q2 20 commercial activity

Commercial activity in Q2 21 driven by Americas and EMEA
- Brazil (21%), Spain (21%), Sweden (13%) and Peru (12%) are the largest contributors to order intake (in MW)

Steep increase in 4 MW+ platforms: 76% of Q2 21 order intake
- 0.8 GW in Siemens Gamesa 5.X order intake in Q2 21

Stable pricing
- ASP variation reflects FX impact, geographic and product mix, including dilution from larger ratings, and project scope

---

1) Onshore order intake (MW) and average selling price of Onshore order intake includes only wind orders

© Siemens Gamesa Renewable Energy
Leading competitive positioning in Offshore: 8.0 GW in order backlog and 7.4 GW in pipeline

Sound commercial performance. YoY comparison reflects strong Service activity in Q2 21 related to new Offshore turbine orders
- Book-to-Bill: 2.0x in LTM as of Q2 21 and 2.9x in Q2 21
Decarbonization commitments and green recovery programs underpin the wind industry potential

Increasing decarbonization commitments. Renewable energy to play a key role in the transformation process
- 46 GW in expected auctions in 2021 and 98 GW beyond

Proposed economic recovery package focused on infrastructure and climate
- US announces 50%-52% emissions reduction target for 2030
- New target: 30 GW Offshore for 2030. PTC\(^1\) and ITC\(^1\) to be extended. BOEM\(^2\) committed to accelerating permitting process

Industrial decarbonization strategy published
- Emission trading system (ETS) to favor energy supply contracts with renewable energy plants

European Commission approves the support mechanism for Offshore projects
- c. 10 GW auctions scheduled for 2021-2025

Wind and solar target of 1,200 GW by 2030 announced
- 14\(^{th}\) five-year-plan approved that refers to the 2060 carbon neutrality goal

---

1) PTC - Production tax credit; ITC - Investment tax credit; BOEM - Bureau of Ocean Energy Management
3) Market charts present the average annual installations according to Wood Mackenzie Q1 2021 outlook. Installations represent the expected annual averages for the 3-year periods

© Siemens Gamesa Renewable Energy
Expected 2021 auctions for 46 GW support good mid- and long-term wind industry prospects

Additional 98 GW planned from 2022 up to 2028:
- 52 GW Onshore
- 45 GW Offshore

Q 2 20 top line supported by Offshore and Service growth and impacted by FX and Onshore order intake deferrals and project delays

Q 2 21 EBIT pre PPA and I&R costs: performance supported by the Offshore and Service markets with no Onshore project cost overruns in Northern Europe and lower impact from COVID-19 and India related costs

Integration and restructuring costs of €71m in Q 2 21 include:
- Capacity closure in Somozas and Cuenca
- Integration of Senvion, end-to-end digitalization and IT digital office projects

Reported net income of -€66m to SGRE shareholders in Q 2 21 includes:
- PPA amortization1 net of taxes of €42m in line with annual expectations
- I&R cost net of taxes of €51m. I&R impact to increase in coming quarters in line with guidance

Q 2 21 CAPEX of €149m reflects investment for future growth:
- Investment in blades and nacelles facility in Le Havre
- R&D investment in new Onshore and Offshore products

1) Impact of PPA on the amortization of the fair value of intangibles
2) LTM revenue as of March 21: €9,910m; LTM EBITDA as of March 21: €238m
3) Within total provisions, Adwen provisions stand at €494m
4) Short- and long-term lease liabilities included in net debt amounted to €841m as of March 31, 2021

© Siemens Gamesa Renewable Energy
Revenue performance driven by Offshore and Service strength

- **Negative FX impact on Q2 21 revenue** (revenue growth at constant exchange rates: +11% in Q2 21\(^1\))
- **Onshore revenue performance impacted by geographic mix and scope of projects with lower erection activity**
  - 1,308 MW installed in Q2 21 vs. 1,543 MW installed in Q2 20
- **Revenue performance in Offshore and Service in line with annual expectations**
  - Strong Offshore performance linked to upfront loading of manufacturing activity ahead of ramp-up of SG 11.0-200 DD manufacturing

\(^1\) FX impact on revenues during Q2 21 amounted to -€99m. Q2 21 revenue at constant exchange rate amounted to €2,435m

© Siemens Gamesa Renewable Energy
Performance in the Offshore and Service markets drives margin improvement in H1 21

**H1 21 EBIT margin pre PPA and I&R costs impacted by:**
- Pricing in the order book for both WTG and Service
- (+) Productivity gains, fully compensating pricing effects
- (+) Volume

In addition, **H1 21 EBIT margin pre PPA and I&R costs benefited from:**
- (+) Upfront manufacturing load in Offshore ahead of the ramp up of the SG 11.0-200 DD
- (+) Reassessment of marketability of WTG inventories
- (+) A comparatively high reduction in Offshore wind turbines failure rates and in third party spending in Service (Q1 21 impact)

**Comparative performance H1 21 vs. H1 20 margin also benefited from:**
- (+) No extra-costs linked to FY20 Northern European pipeline
- (+) Lower extra-costs linked to the Indian market
- (+) Lower impact from COVID-19
Net debt position in Q2 21 driven by working capital and lease liabilities increase year to date

- H1 21 gross operating cash flow of €199m driven by profitability improvement
- H1 21 working capital variation of -€349m² driven by:
  - Annual activity planning with increasing deliveries in H2
  - Normalization of high year-end FY20 working capital performance
  - Asset management program in place to maintain a strict control of working capital
- Gross debt increase (€616m) due to:
  - Total IFRS 16 debt of €841m. Increase of lease liabilities mainly linked to leasing of vessels (€152m)
  - Full withdrawal of EIB loan:+€200m (signed in February 2021) replacing the use of more expensive bilateral lines
- CAPEX of €289m
- Adwen provision uses of €35m in line with FY21 estimate of €125m

---

1) Gross debt includes lease liabilities of €611m as of Sept. 20 and €841m as of Mar. 21. Excluding lease liabilities, gross debt as of Mar. 20 amounts to €1,445m
2) Working capital cash flow effective change

Financing facilities maturity profile (€m)

- Gross bank debt: €1,454m
- Available unused lines: €3,023m
- Optimization of use of cash, reducing the use of short-term debt and drawing only long-term debt

1) Bilateral bank facilities renewed on a yearly basis
2) Maturity exceeding 1 year
3) Gross debt of €1,454m is reflected in accounting books as €1,445m due to €9m of capitalized debt structuring costs that are capitalized during the lifetime of each of the facilities

© Siemens Gamesa Renewable Energy
Outlook & Guidance
Strong potential of wind energy confirmed. SGRE placed to benefit from growth drivers

- **Record installations in 2020** driven by expected incentive changes in US and China
- **Mid-term market decline** from 2020 level driven by Onshore, especially China and US
- **Global installations growth resumed in 2025**
- **Offshore with a sharp increase from 2024:**
  - Expected to reach **20 GW by 2025**
  - And nearly **40 GW in 2030**, with an average of 32 GW 2028-30e, up 2.5x from 2022-24e average

---

### SGRE already taking tangible steps

**OFFSHORE**
- SEn\(^3\) Electrolyzer integrated on the wind turbine generator
- SGRE wind turbine modified to produce H2 at turbine level

**ONSHORE**
- Electrolyzer located at substation level/ close to consumer facilities
- No significant H2 specific wind turbine development required in the short-term

**SERVICE**
- Electrolyzer integrated into an existing wind farm
- Sound benefits for the assets (e.g., H2 new value streams, plant flexibility)

FY21 revenue guidance narrowed and EBIT margin guidance maintained

<table>
<thead>
<tr>
<th></th>
<th>H1 21</th>
<th>FY21 E OLD</th>
<th>FY21 E NEW</th>
</tr>
</thead>
<tbody>
<tr>
<td>Revenue (in €m)</td>
<td>4,631</td>
<td>10,200 - 11,200</td>
<td>10,200 - 10,500</td>
</tr>
<tr>
<td>EBIT margin pre PPA and I&amp;R costs (in %)</td>
<td>5.0%</td>
<td>3.0% - 5.0%</td>
<td>3.0% - 5.0%</td>
</tr>
</tbody>
</table>

Narrowed revenue guidance reflects impacts from:
- Deferrals in order intake
- Delays in project execution, partially driven by clients’ planning and by the pandemic

EBIT margin guidance ranged maintained considering the following:
- H1 21 performance and ongoing efficiency measures linked to the LEAP program
- Normalization of the Service EBIT margin (low failure rates and reduced third party spending in Q1 21)
- Lower contribution of Offshore projects specially in Q4 21 due to the manufacturing ramp-up of the new SG 11.0-200 DD
- Higher expected supply costs driven by:
  - Raw material price increases
  - Volume reduction

1) This outlook excludes charges related to legal and regulatory matters and it is given at constant FX rates. It does not include any impact from a potential lockdown of manufacturing activities or severe disruptions to the supply chain due to COVID-19 developments.
Thank you!
