

## Press release

July 16, 2020

### **Siemens Gamesa and Trianel Windpark Borkum II celebrate new milestone with offshore service contract for Senvion wind turbines**

- Siemens Gamesa wins first offshore service agreement for Senvion wind turbines since the acquisition and further strengthens its leading market position
- 5-year full scope offshore service contract with fixed extension options awarded by Trianel Windkraftwerk Borkum II GmbH & Co. KG for maintenance of Trianel Windpark Borkum II
- Starting date for maintenance operations is August 1, 2020.

Siemens Gamesa Renewable Energy will service Germany's newest offshore wind park Trianel Windpark Borkum II (TWB II). The installation of the 32 Senvion 6.33-MW turbines was completed in May 2020. TWB II has a total output capacity of 200 MW and produces clean energy for around 200,000 households per year. It is located 45 km north of Borkum. The wind park is owned by 20 municipal utilities and municipal companies from Germany and Switzerland.

"We are pleased to have Siemens Gamesa at our side, an experienced and reliable partner for the servicing and maintenance of the 32 wind turbines. With the full commissioning we have successfully completed the construction phase of the offshore wind park. Now the focus is on the resilient and trouble-free operation of the turbines," says Irina Lucke, Technical Managing Director of Trianel Windkraftwerk Borkum II GmbH & Co. KG.

The contract signed late in June marks a double premiere. It is the first time for Siemens Gamesa to win an offshore service contract for a wind park equipped by another manufacturer and the first time Siemens Gamesa will start servicing Senvion offshore turbines since the acquisition of the onshore service business of Senvion in Europe and its intellectual property in January 2020. Since then, the company has been awarded a number of additional onshore service contracts for Senvion turbines due to its comprehensive knowledge and expertise in servicing Senvion technology. Now the first offshore contract is added to the Siemens Gamesa service fleet.

RENEWABLE ENERGY

The maintenance will start on August 1, 2020. It covers full scope service for five years and includes fixed extension options. The operational base for the service campaigns will be Borkum.

Paulina Hobbs, CEO of the Service Business Unit in North Europe and Middle East at Siemens Gamesa, says: "I am thrilled to be including this contract in the service portfolio of Siemens Gamesa Renewable Energy in Germany. This is a step into the future for us, where servicing other brands' offshore turbines will become as much business as usual for us as servicing our own. We want to show the market we are an offshore service market leader - despite who is the manufacturer."

With this agreement, the company is further expanding its market-leading position in offshore service by adding Senvion turbines to its growing offshore fleet of Siemens Gamesa and Adwen turbines. Siemens Gamesa is utilizing innovative service vessels and airborne solutions, leading digital capabilities and technology competencies to secure the safe, reliable and efficient operation of customers' offshore wind projects.

#### **About Siemens Gamesa Renewable Energy**

Siemens Gamesa is a global leader in the wind power industry, with a strong presence in all facets of the business: offshore, onshore and services. The company's advanced digital capabilities enable it to offer one of the broadest product portfolios in the sector as well as industry-leading service solutions, helping to make clean energy more affordable and reliable. With more than 103 GW installed worldwide, Siemens Gamesa manufactures, installs and maintains wind turbines, both onshore and offshore. The company's orders backlog stands at €28.6 billion. The company is headquartered in Spain and listed on the Spanish stock exchange (trading on the Ibex-35 index).

#### **About Trianel Windpark Borkum II**

EWE AG has a 37.5 per cent share in the Trianel Borkum II wind park and a joint venture of the City of Zurich's electricity utility has a 24.51 per cent share. The municipal utility cooperation Trianel together with 17 municipal utilities from Germany holds a 37.99 per cent share.
