Siemens Gamesa appoints Tim Dawidowsky as Chief Operating Officer

- Siemens Energy executive brings substantial turnaround experience, leading large engineering units in challenging circumstances to profitability
- Supply chain and project management expertise critical to Siemens Gamesa in turbulent wind energy sector

Siemens Gamesa has today appointed Tim Dawidowsky as its Chief Operating Officer. Dawidowsky, who has been a member of the Board of Directors of Siemens Gamesa since 2020, joins the company on May 5 from Siemens Energy where he was serving as Senior Vice President, Project Excellence.

In a career spanning more than 28 years in the Siemens group of companies, across a range of engineering and manufacturing sectors, Dawidowsky has held leading functional positions in service, supply chain management and manufacturing as well as a number of CEO roles in different countries.

“Tim has the ideal blend of skills and experience for this role in Siemens Gamesa right now. He has a proven track record of effecting successful turnarounds in businesses operating in complex circumstances like those we are facing,” said Jochen Eickholt, CEO. “His expertise in supply chain management, procurement and project management will be very important for us given the huge challenges we face in that area right now. This is a critical appointment for Siemens Gamesa and I am pleased we have been able to attract such a high caliber executive.”

Dawidowsky joined Siemens AG in 1993 after graduating from the Technical University of Berlin with an MSc in Industrial Engineering and Business. Since then he has worked across numerous industrial sectors including Oil and Gas, Marine, Steel, Mining, Pulp & Paper, Traffic Systems, Power Generation and Transmission. His career has covered postings in multiple German cities as well as Austria and China.

Between 2012 and 2015 he was CEO of Siemens AG’s Transmission Solution business unit, where he led the unit from a restructuring program back to profitable growth and market leadership. A similar turnaround was effected at the Large Drives business unit, where Dawidowsky acted as CEO between 2015 and 2019, restoring a loss-making business to profitable growth.

During the past two years at Siemens Energy, Dawidowsky has been responsible for establishing world-class Project Management practices ensuring excellence in project execution. He will undertake similar programs at Siemens Gamesa.

“The wind energy industry is a vital element in the energy transition and the battle against climate change, but at the moment the manufacturing sector is facing a perfect storm of issues that are threatening its progress,” said Tim Dawidowsky. “I am really excited about joining this

challenge and helping to solve these issues so that we can unleash the full potential of Siemens Gamesa, and return it to leadership in this industry.”

Following his move, will step down from the Siemens Gamesa Board of Directors. A replacement will be announced in due course. Dawidowsky will be based in Madrid.

About Siemens Gamesa Renewable Energy

Siemens Gamesa unlocks the power of wind. For more than 40 years, we have been a pioneer and leader of the wind industry, and today our team of more than 26,000 colleagues work at the center of the global energy revolution to tackle the most significant challenge of our generation – the climate crisis. With a leading position in onshore, offshore, and service, we engineer, build and deliver powerful and reliable wind energy solutions in strong partnership with our customers. A global business with local impact, we have installed more than 120 GW and provide access to clean, affordable and sustainable energy that keeps the lights on across the world.
